

Oregon Climate Education Hub

An online portal that connects educators to the resources they need to integrate climate change into their curriculum for all subject areas and grade levels.

OregonClimateEducation.org

Exemplar Lesson Plans

Developed by teachers, each lesson plan is Oregon-centric so you can teach to the Oregon State standards tomorrow!

2000+ Teaching Resources

Search our online database by keywords, subjects, grade level, and more. All resources have been reviewed by a scientist and a teacher.

Professional Learning

Find the right professional learning opportunity for your school, whether it is a workshop for curriculum development, courses, or articles to guide teachers on how to teach about climate change.

Interactive Help Center

An interactive support center, developed in partnership with MIT Environmental Solutions Initiative, that answers questions about climate science and pedagogical strategies.
